

ClaimsWhat is claimed is:

1 1. A computer controlled user-interactive document
2 editing display system comprising:
3 means for defining one segment of displayed data in
4 a displayed document;
5 means for defining another segment of displayed data
6 in said displayed document;
7 means enabling a user to select to swap said one
8 segment with said another segment; and
9 means responsive to said user selection to swap for
10 swapping the positions of said segments of data with each
11 other.

1 2. The document editing display system of claim 1,
2 further including means for highlighting said one and
3 said another segments prior to swapping the positions of
4 said segments.

1 3. The document editing display system of claim 1,
2 wherein said displayed data in said swapped segments is
3 alphanumeric text.

1 4. The document editing display system of claim 3,
2 wherein said alphanumeric text in each of said swapped
3 segments is a phrase.

1 5. The document editing display system of claim 3,
2 wherein said alphanumeric text in each of said swapped
3 segments is a sentence.

1 6. The document editing display system of claim 3,
2 wherein said alphanumeric text in each of said swapped
3 segments is a paragraph.

1 7. The document editing display system of claim 3,
2 wherein said alphanumeric text in each of said swapped
3 segments is at least one page in length.

1 8. The document editing display system of claim 3,
2 wherein said swapped segments further include images.

2025 RELEASE UNDER E.O. 14176

1 9. A method of user-interactive document editing on a
2 display comprising:

3 defining one segment of displayed data in a
4 displayed document;

5 defining another segment of displayed data in said
6 displayed document;

7 enabling a user to select to swap said one segment
8 with said another segment; and

9 swapping the positions of said segments of data with
10 each other responsive to a user selection to swap.

1 10. The document editing method of claim 9 further
2 including the steps of highlighting said one and said
3 another segments prior to swapping the positions of said
4 segments.

1 11. The document editing method of claim 9, wherein said
2 displayed data in said swapped segments is alphanumeric
3 text.

1 12. The document editing method of claim 11, wherein
2 said alphanumeric text in each of said swapped segments
3 is a phrase.

1 13. The document editing method of claim 11, wherein
2 said alphanumeric text in each of said swapped segments
3 is a sentence.

1 14. The document editing method of claim 11, wherein
2 said alphanumeric text in each of said swapped segments
3 is a paragraph.

1 15. The document editing method of claim 11, wherein
2 said alphanumeric text in each of said swapped segments
3 is at least one page in length.

1 16. The document editing method of claim 11, wherein
2 said swapped segments further include images.

1 17. A computer program having program code included on a
2 computer readable medium for user-interactive document
3 editing on a computer controlled display system
4 comprising:

5 means for defining one segment of displayed data in
6 a displayed document;

7 means for defining another segment of displayed data
8 in said displayed document;

9 means enabling a user to select to swap said one
10 segment with said another segment; and

11 means responsive to said user selection to swap for
12 swapping the positions of said segments of data with each
13 other.

1 18. The computer program of claim 17, further including
2 means for highlighting said one and said another segments
3 prior to swapping the positions of said segments.

1 19. The computer program of claim 18, wherein said
2 displayed data in said swapped segments is alphanumeric
3 text.

1 20. The computer program of claim 19, wherein said
2 alphanumeric text in each of said swapped segments is a
3 phrase.

1 21. The computer program of claim 19, wherein said
2 alphanumeric text in each of said swapped segments is a
3 sentence.

1 22. The computer program of claim 19, wherein said
2 alphanumeric text in each of said swapped segments is a
3 paragraph.

1 23. The computer program of claim 19, wherein said
2 alphanumeric text in each of said swapped segments is at
3 least one page in length.

1 24. The computer program of claim 19, wherein said
2 swapped segments further include images.
